

Quick Start Guide for Accessing the Lamoni Newspaper Archive

<http://lamoni.advantage-preservation.com>

This guide is intended to be brief. For a more comprehensive guide click on the **Resources** menu at the top of the webpage, or go directly to <http://www.advantagearchives.com/resources/>

The body of the home page is shown here

For simplicity, you should either—

Search for something in the archive

or

Browse to a specific title on a specific date

Mixing the two can get confusing, so just click the **Home** menu button at the top any time you need to return to this page and start afresh.

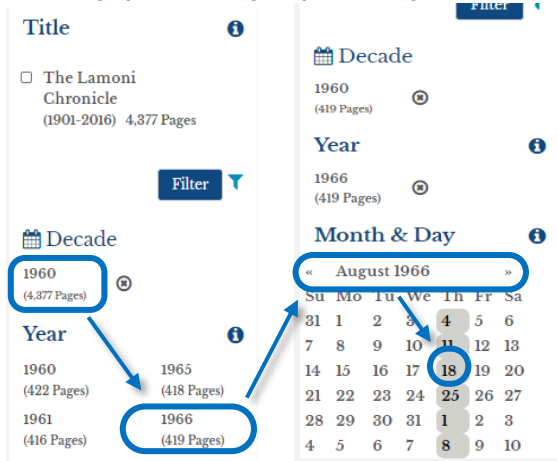

HOW TO BROWSE TO A SPECIFIC DATE

In this example we will select The Lamoni Chronicle title, then navigate to the 8/18/1966 issue that exists.

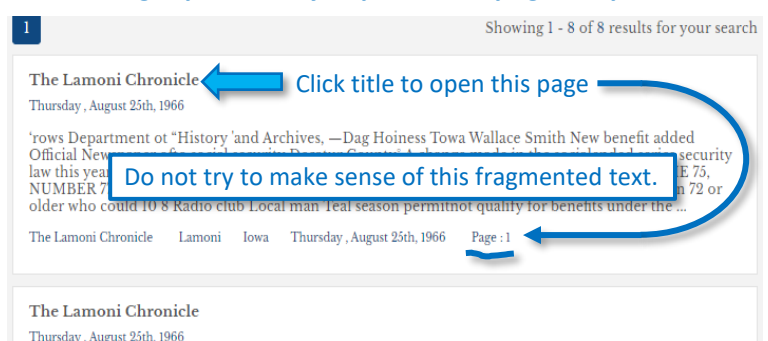

Once you select any browse option, a left panel opens for you to select a decade, year, month, and day.

Left panel lets you pick a day

Right panel lets you pick which page to open

Once a page is opened you can move to the next or previous page, zoom in or out, and use other controls.

The highlighted days on the calendar are days in which issues exist based on your selections (if any). The X buttons, ⊗, in the left panel can be clicked to cancel and clear your chosen year or decade. You can also use the browser's back button to return to an earlier point in your selections.

So far this does not work on an iPad or smart phone

HOW TO SEARCH FOR SOMETHING

In the Search For section, enter the keywords and date range or use the default date range from first to last dates in the entire archive.

Search For

▼ All Of The Words Find people AND places AND events + -

▼ Between 01/01/1895 And 12/31/2016 📅 🕒 Discover 🔍

In this example we want to find articles about William Hopkins who helped establish the Jefferson Highway in 1915 ± 5 years. We will drop his first name to find articles that excluded it. Illustrated below is a screenshot with the keywords and the calendars for selecting the date range. It may look odd selecting 1910 twice for start date below, but the first 1910 selected the decade of the 1910s and the second selected the year within that decade.

Research

You Are Searching For Pages Containing:

▼ All Of The Words **hopkins jefferson highway** + -

▼ Between 1/1/1910 And 12/31/1920 📅 🕒 **Refine Search**

01/01/1910 12/31/1920 **Apply** ✕

Select decade **Select year** **Select month** **Select day** **Select Start Date**

Click in the dates field to select a date range

Click either of these to cancel your date range

Similarly select a decade, year, month, and day **Select End Date**

Click after selecting dates

Click after entering the words and date range

The search result lists every page that has all the keywords on it, ordered from most to least hits of the keywords that are on the page.

Do not try to make sense of the fragmented text under each title. It is only useful for seeing the hits, i.e., keywords found on the page. In this example, there are 12 hits on page 1 of The Lamoni Chronicle for November 18, 1915.
